CS 290: Project Proposal

11/5/17

Michael Canaday

Fictional Photography Business

I will create a website about a fictional photography business.

Homepage:

The homepage will contain a picture carousel animation which shows some of the past work performed by the business. There will be at least three horizontal menu items near the top of the homepage which will contain links to the three subpages.

Subpage 1:

Subpage 1 will contain a scroll box which will contain information about the photographer's background, history and past work.

Subpage 2:

Subpage 2 will contain an unordered HTML list which will contain pricing, and booking information. There will also be a download link that has a file which contains a more detailed list of pricing and related items. There will be an outside link to the Professional Photographers Association.
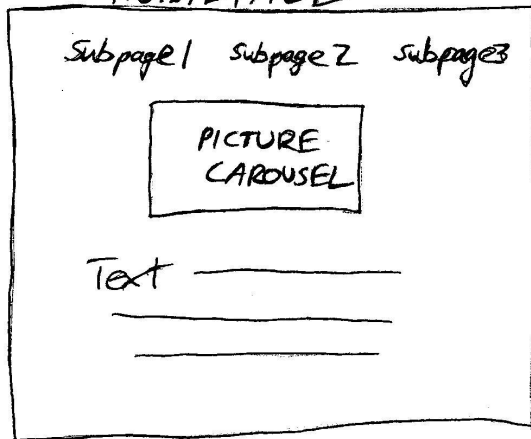

Subpage 3:

Subpage 3 will contain reviews by past customers about their experiences with the business.
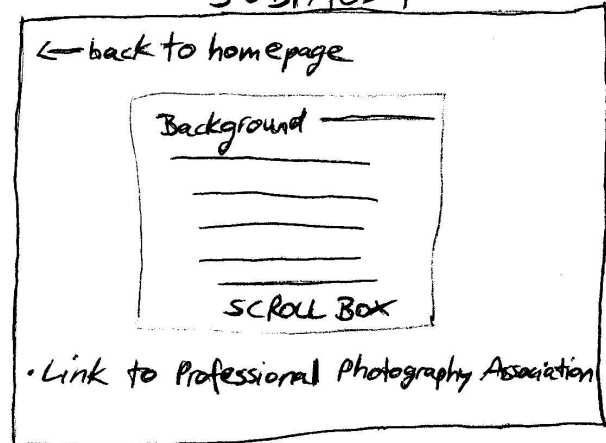

Additional Features:

Additional features will be implemented as needed.

-->the next page contains a diagram of the approximate layout of the website

HOMEPAGE
